

ROBERT STEWART

Full-Stack Software Engineer | Council Bluffs, IA | 402-595-0211 | rms.dev@outlook.com
[robert-stewart.dev](mailto:rms.dev@outlook.com) | github.com/rs691 | linkedin.com/in/robert-stewart-m

PROFESSIONAL SUMMARY

Designs and operates multi-tenant production systems end to end — mobile clients, REST and real-time backends, admin tooling, and AWS cloud infrastructure. Shipped platforms live on the App Store and Google Play, with tenant isolation and role-based security designed into every layer. Works comfortably across the stack, from legacy CRUD applications and infrastructure migrations to event-driven services and multi-agent orchestration. Currently pursuing an M.S. in Data Science at Bellevue University to deepen that systems-thinking further.

TECHNICAL SKILLS

Languages: Python, Java, C#, Dart, TypeScript, JavaScript, PHP, SQL, HTML/CSS

Frontend: React, Next.js, Flutter, Vue.js, HTMX, Tailwind CSS

Backend: Node.js, Express, Django, Laravel, ASP.NET, REST APIs, WebSockets / Socket.io

Cloud & DevOps: AWS (ECS, Lambda, RDS), Azure, Docker, GitHub Actions, CI/CD, Vercel

Data: PostgreSQL, MySQL, SQL Server, Redis, Firestore, Supabase

AI Engineering: Gemini API, multi-agent orchestration, event-driven AI systems, LLM integration

Testing: Jest, React Testing Library, Flutter Test, Postman

PROFESSIONAL EXPERIENCE

NE Innovation Labs — Omaha, NE

Dec 2025 – Present

Full-Stack Software Engineer

- **Multi-App Architecture:** Designed and deployed YourOpoly, a multi-tenant community rewards platform in production on iOS and Android — built with Flutter, Node.js, Express, MySQL, and AWS ECS with shared real-time infrastructure.
- **Agentic Orchestration:** Engineered an event-driven agent system (Gemini API, Google AI Studio) that autonomously manages player lifecycles, session cleanup, and analytics summaries, and powers a context-aware player chatbot — applied selectively where deterministic logic fell short.
- **Infrastructure Scaling:** Migrated legacy Firebase prototypes to containerized AWS ECS supporting 1,000+ regional concurrent users; automated tenant onboarding workflows, cutting setup time by 35%.
- **CI/CD & Code Quality:** Built GitHub Actions pipelines with semantic validation gates ahead of App Store, Google Play, and AWS deployments, eliminating manual release steps and lowering regression risk.
- **REST APIs & Real-Time:** Delivered REST endpoints and Socket.io real-time messaging; implemented JWT auth, tenant-scoped data isolation, and role-based access control across all layers.

Bellevue University — Bellevue, NE

Dec 2023 – April 2026

CIS Peer Tutor

- Mentored 100+ students in Python, JavaScript, database design, and software engineering principles.
- Conducted code reviews focused on Clean Code practices, test-driven development, and system design fundamentals.
- Created structured review materials and database design rubrics adopted across multiple CIS course sections.

Pierson Wireless — Omaha, NE

Oct 2022 – Nov 2023

Junior Web Developer / IT Support Specialist

- Developed internal business applications using .NET technologies (C# and Blazor) with SQL Server, deployed through Azure CI/CD pipelines.
- Launched a web-based cost estimation tool that cut manual quote generation workload by 40%.
- Integrated safety compliance forms, hazard reporting, and a service desk ticketing system into the company CMS, adopted company-wide.
- Automated user provisioning and directory synchronization (JumpCloud), reducing administrative overhead by 50%; managed endpoint security with CrowdStrike Falcon.

PROJECTS

YourOpoly — *Flutter, Node.js, MySQL, AWS ECS, Redis, Socket.io, Gemini API*

[App Store](#) | [Google Play](#) | [goodlifegames.co](#)

- Cross-platform community rewards platform — users visit local businesses, scan QR codes/barcodes to earn points, and redeem deals — with map-based business discovery, promotions, and leaderboards, live on both major app stores.
- OAuth sign-in, Redis-backed caching, and a background agent service that manages player activity and generates analytics.

Multi-Product Admin Platform — *Node.js, React/Next.js, MySQL, AWS*

- Role-based console serving two products (YourOpoly and GLG-Bingo) on shared backend services, with per-product and per-tenant control panels for granular access and data isolation.
- Separated a privileged administrator layer (game logic, permissions, configuration) from scoped self-service dashboards, deliberately limiting the surface area tenant owners can modify.

E-Commerce Application — *Next.js, React, PostgreSQL, Stripe SDK*

[Live Demo](#)

- Next.js storefront with server-side rendering, Stripe payment integration, and state-persistent cart management.

Django Reservation System — *Django, HTMX, Python, SQLite*

[Live Demo](#)

- Booking app with transaction-safe scheduling conflict resolution and automated email workflows.

EDUCATION

Bellevue University — Bellevue, NE

Jun 2025 – Jun 2028

M.S. Data Science — In Progress

Bellevue University — Bellevue, NE

May 2022 – Jun 2025

B.S. Software Development

Honors: Omega Nu Lambda National Honor Society · Darrel H. Gottsch Endowed Scholarship · DREAM Scholarship

Iowa Western Community College — Council Bluffs, IA

May 2019 – May 2022

A.A. Computer Science
